

PARTNER PROPOSITION

United for a greater digital future

Connect, Grow, and Give Back

About Infrastructure Masons

The digital future demands a commitment to **education** to foster future talents and leaders, **inclusion** to reflect humanity in everything digital, **innovation** to solve technology's toughest challenges, and environmental **sustainability** to protect generations to come.

Infrastructure Masons (iMasons) is a global, nonprofit, professional association of individuals connected and empowered to build a greater digital future for all.

Initiatives

iMasons provides an agnostic platform for members to connect, grow, and give back across four strategic pillars: Education, Inclusion, Innovation, and Sustainability.

Education

We bridge the talent gap by partnering with top training programs, providing scholarships, and supporting curriculum development. Our highly successful Capstone Project offers students the opportunity to design digital infrastructure and under the guidance of industry mentors, introducing them to our industry as an interesting, important, and welcoming place to work.

Inclusion

We foster diversity and equity by building awareness and education within the industry about underrepresented groups. Members participate and support our Member Resource Groups including iM Women, Armed Forces, LatinX, and Millennial-Gen Z.

Innovation

We are a community of innovators and industry leaders dedicated to building a greater digital future. Experts from diverse backgrounds share insights and experiences, collaborate, and exchange knowledge with the best and brightest.

Sustainability

We are committed to establishing an industry framework for the design, build, and operation of a full life cycle sustainable infrastructure. We drive collaboration to collect and share best practices with operators, providers, supply chain professionals, and policymakers globally.

Community

iMasons is a community of over 6,000 people in 130 countries who design, build, and operate the digital infrastructure the world relies on — we are the builders of the digital age. iMasons is growing rapidly in terms of members, stature, and impact, with an expanding network of Local Chapters in the Americas, EMEA, and APAC.

Partners

iMasons Partner companies power and make possible the activities of iMasons. iMasons Partners are the companies that enable the digital age, all aligned on our core values. Along with leaders of the largest and most influential digital infrastructure portfolios on the planet, Global and Regional Partners hold seats on the iMasons Advisory Councils that meet in-person to network and to explore and solve the issues they face as they build a better connected world for everyone.
